## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1-18, 28-32 and 37-41 are objected to because of the following informalities: Claim 1 recites the limitation of each sampler sampling a portion of the input signal corresponding to a transition of the input data signal and a portion of the input data signal corresponding to data". However, it is noted that the specification and the drawing fig. 1 the waveform "3", teach that sampler 4 samples the waveform at point "T2" which is not a transition, as the waveform is in high state since point T1 until point T3. The claim should be amended in such a way so as to be consistent with the specification and the drawing. The same comment applies to claim 10, 28, 37, 40 and any dependent claim, respectively. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-18, 28-32 and 37-41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites the limitations of " the portion of the input data signal corresponding to data being in

between two consecutive transitions of the input data signal". However, the specification, as filed, does not provide support for such limitation as claimed. The same comment applies to claim 10, 28, 37, 40 and any dependent claim, respectively.

#### ***Response to Arguments***

4. Applicant's arguments, see response, filed on 5/26/05, pages 15-19, with respect to The 102 rejections of claims 1, 2, 37 and the 103 rejection of claims 3-6, 10, 14, 28, 32, 38-41 have been fully considered and are persuasive. The 102 rejections of claims 1, 2, 37 and the 103 rejection of claims 3-6, 10, 14, 28, 32, 38-41 have been withdrawn.

#### ***Allowable Subject Matter***

5. Claims 19-27 and 33-36 are allowed.

#### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2637

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
